DETAILED ACTION

Response to Arguments

- 1. Applicant's arguments filed 8/20/2007 have been fully considered but they are not persuasive. The applicant argues that the spring is not relaxed in the open or closed position. The examiner disagrees. The force is only applied to the spring when in the action of closing. The spring is relaxed in the open position as shown in fig. 2. The spring is relaxed and locked in the closed position in fig. 4. A force is being applied to the spring in fig. 3.
- 2. The applicant also argues the spring of Schwarz is slideable and not fixedly connected. The claims of the application do not state that the spring be fixed in a stationary position or not slideable. The claims only state that the spring be mounted to the handles. Schwarz reads on the limitation of mounted. Bearing points 15 and 31 are stationary on the handgrips.

Election/Restrictions

3. Claims 9-12 and 14-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 6/10/2008.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

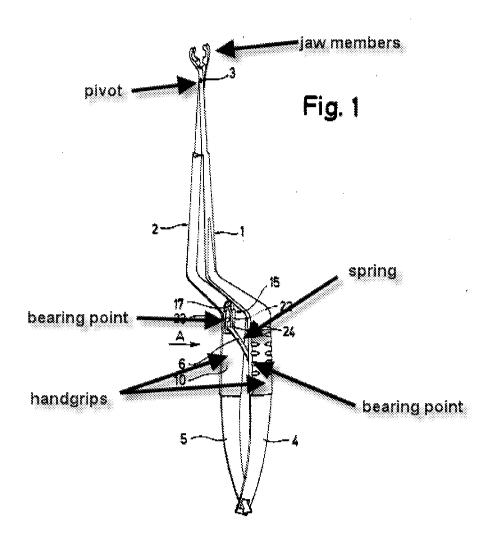

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3734

5. Claim 1-7 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Schwarz et al 4462404.

6. Schwarz et al. teaches a material grasping and holding instrument with a handle consisting of two handgrips and a holding portion that consists of at least two jaw members, a spring element, an end position that releases the holding portion, an end position that locks the holding portion, wherein the spring element configured as a flat spring and connecting the two handgrips to one another is mounted between the handgrips of the handle in such a way of a bearing point of a handgrip on the spring element between two end positions that relax the spring element; wherein the spring element is mounted so that is pretensioned between the handgrips; wherein the spring element is stored with one end at a storage point in the area of the proximal end of a handgrip and the other end at a storage point in the center area of the other handgrip; wherein a handgrip of the handle is configured as to rigidly conjoined in one piece with one jaw member of the holding portion, wherein the other handgrip of the handle is pivotally connected with the other jaw member; an extension, on the free end of which extension the spring element is stored; wherein the bearing point where the spring element in a center area of the handgrip is stored, is arranged in an upper end position the released the holding portion, above a line (L1) which connects the pivot point between a rotatable handgrip and a rotatable jaw member with the bearing point of the spring element in the area of a proximal end of the rigid handgrip.

Art Unit: 3734

Allowable Subject Matter

7. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3734

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MICHAEL G. MENDOZA whose telephone number is (571)272-4698. The examiner can normally be reached on Mon.-Fri. 9:00 a.m. - 5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Todd Manahan can be reached on (571) 272-4713. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
